

**François Giuliano** (FG), MD-PhD, is Pr of Therapeutics at the University of Versailles-Saint Quentin, and has a specialist urological practice at the R. Poincaré Academic Hospital of Garches, France. His practice focuses on sexual medicine especially in the context of neurological diseases.

FG's major research interests include the pathophysiology, diagnosis and management of sexual dysfunction, including erectile dysfunction and ejaculatory disorders.

He has an extensive experience of conducting clinical trials. He is also interested in an evidence-based approach to clinical practice, and has participated in the development of clinical epidemiology and medical education.

He has an active research laboratory that investigates the pharmacological mechanisms controlling ejaculation, erectile function and female sexual and lower urinary tract functions, with a particular interest in neural control involving an integrated approach, using neuroanatomical, neurophysiological, biochemical and pharmacological techniques.

FG is a widely published author in peer-reviewed journals, and has edited and contributed to several books and is involved in the production of guidelines and care pathways. He has been Vice-Chairman of the International Consultation of Sexual Dysfunctions in 1999, 2004, 2009 and 2015 and has won several national and international awards. He is past-president of ESSM.
